Nuclear Engineering and Design 169 (1997) 201

Nuclear Engineering and Design

Subject Index of Volume 169

Thermal hydraulics and safety

In-vessel coolability and retention of a core melt
T.G. Theofanous, C. Liu, S. Additon, S. Angelini, O. Kymäläinen, T. Salmassi 169 (1997) 1

The first results from the ACOPO experiment
T.G. Theofanous, M. Maguire, S. Angelini, T. Salmassi 169 (1997) 49

The coolability limits of a reactor pressure vessel lower head
T.G. Theofanous, S. Syri 169 (1997) 59

Ex-vessel boiling experiments: laboratory- and reactor-scale testing of the flooded cavity concept for in-vessel core retention Part I: Observation of quenching of downward-facing surfaces
T.Y. Chu, B.L. Bainbridge, R.B. Simpson, J.H. Bentz 169 (1997) 77

Ex-vessel boiling experiments: laboratory- and reactor-scale testing of the flooded cavity concept for in-vessel core retention Part II: Reactor-scale boiling experiments of the flooded cavity concept for in-vessel core retention
T.Y. Chu, J.H. Bentz, S.E. Slezak, W.F. Pasedag 169 (1997) 89

Creep considerations for the lower head
Y.R. Rashid 169 (1997) 101

In-vessel retention of corium at the Loviisa plant
O. Kymäläinen, H. Tuomisto, T.G. Theofanous 169 (1997) 109

Turbulence modelling for large volumetrically heated liquid pools
T.N. Dinh, R.R. Nourgaliev 169 (1997) 131

On heat transfer characteristics of real and simulant melt pool experiments
T.N. Dinh, R.R. Nourgaliev, B.R. Sehgal 169 (1997) 151

Effect of fluid Prandtl number on heat transfer characteristics in internally heated pools with Rayleigh numbers up to 10^{12}
R.R. Nourgaliev, T.N. Dinh, B.R. Sehgal 169 (1997) 165

SULTAN test facility for large-scale vessel coolability in natural convection at low pressure
S. Rougé 169 (1997) 185
